

Green Globe Award

Every now and then it is nice to be recognized for your efforts. Fourth grade teacher Janet Charnley and the student body have been making continuous efforts to make our school a true blue green school. Well, their hard work has paid off!

The Evergreen School has been awarded King County's Leadership in Sustainable School Green Globe award. There was an awards ceremony on April 22. at Westlake center.

The award recognizes schools and school districts for outstanding efforts to reduce solid waste, and for initiating or improving other sustainable strategies such as water and energy conservation, environmental purchasing, greenhouse gas reduction and hazardous waste reduction.

Nominees for this award were selected from the King County Green Schools Program which assists schools and school districts to initiate or expand conservation practices, and to increase awareness among administrators, staff, students and parents.

This is a great honor for the school and the Evergreen community should take pride in the leadership role the school has taken in this subject matter. Congratulations to all!
